PHOTOVOLTAIC CABLES
As the worldwide leader in the cable industry, Prysmian Group believes in the effective, efficient and sustainable supply of energy and information as a primary driver in the development of communities.

With this in mind, we offer major global organisations across industries with best-in-class cable solutions, based on state-of-the-art technology.

Through our two renowned commercial brands - Prysmian and Draka, represented in almost 50 countries, we’re constantly close to our customers. Our product enable them to develop the world’s energy and telecoms infrastructures, and achieve sustainable and profitable growth.

In our energy business, we design, produce, distribute and install cables and systems for the transmission and distribution of power at low, medium, high and extra-high voltage.

In telecoms, the Group is a leading manufacturer of all types of copper and fibre cables, systems and accessories - covering voice, video and data transmission.

Drawing on over 130 years’ experience and continuously investing in R&D, we apply excellence, understanding and integrity to every thing we do. Our goal is to meet and exceed the precise needs of our customers across all continents, and at the same time shape the evolution of our industry.
We enable production and supply of renewable energy

To meet an ever-growing need for power, the world is increasingly turning to renewable and sustainably sourced solar energy. In response to this demand, Prysmian cables are helping businesses in the renewable industry globally to convert these new opportunities into reality.

Our technologies, which include cables used in photovoltaic plants, are used across the renewables sector, supporting the operations of contractors and developers, grid operators, system integrators and panel makers.

Always aware of our responsibility to the environment, we’re constantly driving innovation in our industry, aiming to help the renewable industry deliver projects, that benefits the future of our planet and their businesses.

„We link sustainable ideas to real-world results“

Photovoltaic system
Our strategy is to have a full cable portfolio and deliver all the cable types demanded for photovoltaic installation.

**Energy cables**
- LV cables
- MV cables
- HV cables

**Solar cables**
- TECSUN (PV) H1Z2Z2-K
- TECSUN (PV) S3Z2Z2-K

**Special cables**
- Fibre optic cables
- Data cables
- Control cables
FIXED & FLEXIBLE INSTALLATION

INSTALLATION CABLE HALOGEN-FREE
TECSUN (PV) H1Z2Z2-K

Application
PRYSMIAN Solar cables TECSUN (PV) – H1Z2Z2-K is intended for use in photovoltaic power supply systems indoors and outdoors, in industrial and agriculture fields. Suitable for application in equipment with protective insulation (Class II), in explosion hazard areas and may be installed as fixed or freely suspended or free movable.

Applicable for installation in cable trays, conduits, on and in walls as well as for direct burial. The cable is designed to operate at a normal maximum conductor temperature of 90°C, but for a maximum of 20,000 hours a max. conductor temperature of 120 °C at a max. ambient temperature of 90°C, is permitted.

The version TECSUN (PV)(C) H1Z2Z2-K has an additional metallic screen braid, made of tinned copper wires, as a protective element against rodents or impact.

Installation note
TECSUN(PV) cables are suitable for direct burial in ground. Installation conditions per VDE 0800 Section 174 § 5.4.2 and VDE 0891 Section 6 § 4.2 should be taken in consideration.

Technical data
- Rated voltage: 1.5 kV DC and 1.0 kV AC
- Max. voltage: 1.8 kV DC and 1.2 kV AC
- Test voltage: 15 kV DC and 6.5 kV AC
- Current carrying cap: EN 50618, A-3
- Electrical tests: EN 50618, Table 2:

Temperature range
- Conductor temperature: +90°C
- Max. conductor temperature: +120°C for max. 20,000 hours
- Short circuit temperature: +250°C 5 sec.
- Installation temperature: -25°C to +60°C
- Operating temperature: -40°C to +90°C
- Resistance to cold: EN 50618, table 2

Standard & Direktive & Approval
- Standard: DIN EN 50618
- Direktive: CE, RoHS, REACH
- Approval: <VDE>, TÜV-certificate no. 60103637

Construction
Conductor:
- Electrolytic tinned copper
- Finely stranded
- Class 5 acc. to IEC 60228
Insulation:
- Halogen-free
- Cross-linked HEPR 120°C, white
Outer sheath:
- Halogen-free cross-linked
- EVA rubber 120°C
- Insulation and sheath solidly bound
- Colour: Black, blue or red
- UV-resistant EN 50289-4-17, method A

All information is presumed accurate upon issuing. Prysmian Group reserves the right to change in specifications without prior warning. Product specifications are not contractually binding without prior permission from Prysmian Group.
Fixed & Flexible Installation

**INSTALLATION CABLE HALOGEN-FREE**

**TECSUN (PV) H1Z2Z2-K**

**Chemical parameters**

Resistance to fire:
- Acc. to EN 50618, Table 2
- Single Cable Flame Test: EN 60332-1-2
- Low Smoke Emission: EN 61034-2 (Light Transmittance > 70%)
- Halogen-free per EN 50525-1, Annex B.

Prysmian internal tests:
- Multiple Cable Flame Test: EN 50305-9
- Low Toxicity per EN 50305 (ITC < 3)

Resistance to oil:
Prysmian internal test, on sheath
- 24h, 100°C (meets VDE 0473: 811-404 and EN 60811-404)

Weather resistance:
- Acc. to EN 50618, Annex E and Table 2:
- UV Resistance on sheath: tensile strength and elongation at break after 720h (360 Cycles) of exposure to UV lights acc. to EN 50289-4-17, Method A.
- Ozone resistance: per Test Type B (DIN EN 50396).
- The internal test:
- Water Absorption (Gravimetric) per DIN EN 60811-402.
- Acid and alkaline resistance Acc. to EN 50618, Annex B:
- 7 days, 23°C (N-Oxalic Acid, N-Sodium Hydroxide) acc. to EN 60811-404.

Ammonia Resistance:
Prysmian Internal Testing:
- 30 days in Saturated Ammonia Atmosphere.

**Mechanical parameters**

Max. tensile load 15 N/mm² in operation:
- 50 N/mm² during installation per HD 516, DIN VDE 0298 section 3 § 7.1 and Section 300 § 5.4.1

Bending radius:
- Acc. to EN 50565-1. See table

Abrasion resistance:
Prysmian Internal Testing:
- Acc. to DIN ISO 4649 against abrasive paper;
- Sheath against sheath;
- Sheath against metal;
- Sheath against plastics.

Shrinkage Test:
- Acc. to EN 50618. See table
- Maximum Shrinkage <2% (test acc. to EN 60811-503)

Pressure Test at High Temperature:
Prysmian Internal Testing:
- 50% acc. to EN 60811-508.

Dynamic Penetration Test:
- Acc. to EN 50618, Annex D:
- Meets requirements of EN 50618.

Shore-Hardness:
Prysmian Internal Testing:
- Type A: 85 acc. to DIN EN ISO 868

Durability of Print:
- Acc. to EN 50618:
- Test acc. to EN 50396.

Rodent resistance:
- Safety can be optimized by utilizing protective hoses and cables with spinning or braid metallic coatings.

Thermal parameters

Max. operating temperature of the conductor:
- Max. 90°C at conductor (lifetime acc. to EN 50618 = 25 years
- Lifetime acc. to Arrhenius-Diagram TECSUN = 30 years).
- For a maximum of 20,000 hours a max. conductor temperature of 120°C at a max. ambient temperature of 90°C is permitted.

Max. short circuit temperature of the conductor:
- 250°C (5 s.)

Ambient temperature:
- Installation and handling: -25°C up to 60°C
- In operation: -40°C up to +90°C

Resistance to cold:
- Acc. to EN 50618, Table 2:
- Cold Bending Test at -40°C acc. to DIN EN 60811-504;
- Cold Elongation Test at -40°C acc. to DIN EN 60811-505;
- Cold Impact Test at -40°C acc. to DIN EN 60811-506, EN 50618-C.
- Damp-Heat Test acc. to EN 50618, Table 2:
- 1,000h at 90°C and 85% humidity (test acc. to EN 60068-2-78).

Ammonia Resistance:
Prysmian Internal Testing:
- 30 days in Saturated Ammonia Atmosphere.

**FIXED & FLEXIBLE INSTALLATION**

**INSTALLATION CABLE HALOGEN-FREE**

**TECSUN (PV) S3Z2Z2-K 1,8/3 kV AC**

**Application**

Halogen-free single core cables, sheathed, for junction boxes and inverters, with improved fire performance, increased heat resistance and suitable for direct burial. Intended for use in photovoltaic power supply systems, at nominal voltage rate of 1,8/3kV AC, as interconnection between central inverter and transformer station.

Applicable indoor and outdoor in explosive and hazardous areas within industry and agriculture. Also suitable for applications in equipment with protective insulation class II or as short and ground fault protection. Can also be used as unfused connections in switchgear and distribution boards up to 1000 V (DIN VDE 0100-520 and DIN VDE 0660-500) and in accumulator circuits (DIN 5510 part 5).

**Installation note**

TECSUN(PV) cables are suitable for direct burial in ground. Installation conditions per VDE 0800 Section 174 § 5.4.2 and VDE 0891 Section 6 § 4.2 should be taken in consideration.

**Technical data**

- Rated voltage: 1,8/3 kV AC
- Max. operating voltage AC: 2,1/3,6 kV
- Max. operating voltage DC: 2,7/5,4 kV
- AC test voltage: 6,5 kV (5 min)
- Current carrying cap: DIN VDE 0298-4

**Mechanical data**

- Tensile load:
  - Max. 15 N/mm² in operation
  - Max. 50 N/mm² during installation
- Torsion stress:
  - Max. ± 150°/m during installation
- Bending radius:
  - Acc. to DIN VDE 0298 part 3

**Temperature range**

- Operating temperature: +90°C
- Max. conductor temperature: +120°C for max. 20,000 hours
- Short circuit temperature: +250°C
- Fixed installation: -40°C to +90°C
- Flexible installation: -40°C to +90°C

**Standard & Direktive**

- Standard: DIN EN 50618
- Direktive: CE, RoHS, REACH

**Construction**

- Conductor:
  - Finely stranded tinned copper
  - Class 5 acc. to IEC 60228
- Insulation:
  - Halogen-free
  - Heat resistant
  - Cross-linked rubber compound
  - Acc. to DIN VDE 0250-606

**Outer sheath**

- Halogen-free cross-linked
- Heat resistant
- Cross-linked rubber compound
- Acc. to DIN VDE 0250-606
- Black and meter marked
- UV-resistant

**Chemical data**

- Flame-retardant:
  - IEC 60332-1-2 single cable
  - IEC 60332-3-24 bunched cables
- Smoke emission:
  - EN 61034-2 light emission ≥ 70%

**Halogen-free**

- EN 60754-1

**Corrosivity**

- EN 60754-1
- pH ≥ 4.3 and
- Conductivity ≤ 2.5 µS/mm

**Toxicity**

- EN 50305 index ITC = 3

**Weather resistance**

- EN 50618
- Ozone resistant
- UV-resistant

**Acidity and alkaline resistance**

- EN 50618

FIXED INSTALLATION

INSTALLATION CABLE HALOGEN-FREE
HIK AL-S 0,6/1 kV

Application
Halogen-free fire retardant cable with low smoke and corrosive gas emission during fire. Suitable for application indoors and outdoors in pipes, trays or for directly burial in soil. Can be ploughed down with caution. Must be installed according to S.B.

Technical data
- Rated voltage: 0.6/1 kV
- Test voltage: 4000 V
- Bending radius: 15 x D

Temperature area
- Max. conductor temperature: +90°C
- Short circuit temperature: +250°C
- Lowest temp. at installation: -20°C
- Below 0°C caution must be exercised

- Cenelec HD 604-5D, IEC 60502-1
Direktive:
- Fulfills LVD, RoHS & REACH
CPR:
- CE-marked acc. to class Eca
- DoP no. 1002844 - download PDF
- www.prysmiangroup.dk/dop

Construction
Conductor:
- Stranded annealed aluminium
- Acc. to EC 60228 class 2.
- From 50-240 mm²: sector shaped
Insulation:
- PEX
Core colouring:
- 4-core: brown, black, grey, blue
Separator:
- Plastic tape
Outer sheath:
- Halogen-free compound
- UV-resistant
- Gray and meter marked

Material characteristics
- Flame-retardant: IEC 60332-1
- Halogen-free: IEC 60754-1
- Corrosivity: IEC 60754-2
- Smoke density: IEC 61034
- Current load: Acc. to SB 2001:6

Material characteristics
- Flame-retardant: IEC 60332-1
- Halogen-free: IEC 60754-1
- Corrosivity: IEC 60754-2
- Smoke density: IEC 61034
- Current load: Acc. to SB 2001:6

Conductor cross section mm² | Outer. diameter mm | Weight kg/km | Max. current load A | Delivery m | Prysmian EAN-no.

LV cable
Hagesholm Solcellepark
**FIXED INSTALLATION**

**INSTALLATION CABLE HALOGEN-FREE
AXQJ PURE 0,6/1 kV**

**Application**
Halogen-free, flame retardant and self-extinguishing in case of fire. Smoke emission during fire is low, transparent and not harmful to electronic equipment. Applicable as power cable for fixed installation indoors and outdoors, in pipes, ground or water as well as in switchgear and explosive environments. Can with caution be plowed down.

**Technical data**
- Rated voltage: 0,6/1 kV
- Test voltage: 4000 V
- Bending radius:
  - Fixed installation 8 x D
  - During installation 12 x D
  - Ploughed down: 8 x D

**Temperature area**
- Max. conductor temperature: +90°C
- Short circuit temperature: +250°C
- Lowest temp. at installation: -20°C
- Below 0°C caution must be exercised

**Standard & Direktive & Approval**

**Standard:**
- Cenelec HD 603 part 3, section L
- Cenelec HD 604 – HF materials

**Direktive:**
- Fulfills LVD, RoHS, REACH-direktives

**CPR:**
- CE-marked acc. to class Dca-s2d2a2
- DoP no. see table
- [www.prysmiangroup.dk/dop](http://www.prysmiangroup.dk/dop)

**Construction**

**Conductor:**
- Multi-stranded annealed
- Sector-shaped
- Aluminium acc. to IEC/EN 60228 class 2.

**Insulation:**
- PEX

**Core colouring:**
- 3-core: brown, black, grey
- 4-core: brown, black, grey, blue

**Screen:**
- Concentric screen of annealed copper wire with counter spiral of copper band

**Inner sheath:**
- Halogen-free compound

**Outer sheath:**
- Halogen-free compound
- UV-resistant
- Black and meter marked

**Material characteristics**
- Flame-retardant: IEC 60332-1 & 3
- Halogen-free: IEC 60754-1 & 2
- Smoke density: IEC 61034
- Corrosivity: IEC 60754-1 & 2
- Current load: Acc. to SB 2001:6

All information is presumed accurate upon issuing. Prysmian Group reserves the right to change in specifications without prior warning. Product specifications are not contractually binding without prior permission from Prysmian Group.

FIXED INSTALLATION

UC FIBRE - OUTDOOR CENTRAL TUBE CABLE
1000N 2-24 FIBRES LLDPE - A-DQ(ZN)B2Y

Application
Outdoor central tube cable with 2-24 fibres, glass elements and LLDPE sheath. Applicable for LAN and WAN backbones, telecom access lines, fibre to business and fibre to the building drop connections as well as fibre to the home drop and access connections. With its LLDPE sheathing this cable is ideal for outdoor installation where the installation conditions are not too harsh.

The cable features a high tensile strength and a degree of rodent protection, effective in many cases. It is equally suited for installation in ducts and on trays.

The cable is UV-resistant, metal-free and longitudinally watertight.

Standard
- IEC 60794-1
- ISO 11801 2nd edition
- EN 50173-1:2002

Construction
Loose tube:
- ø2.8 mm jelly filled tube with 2-16 fibres
- ø3.5 mm loose tube with 24 fibres

Strength member:
- Waterblocker E-Glass fiber element

Fiber colour code ø2.8 mm:
- Red, green, blue, yellow, white, grey, brown, violet, turquoise, black, orange, pink

Fiber colour code ø3.5 mm:
- Yellow, white, grey, turquoise, orange, pink, yellow, white, grey, turquoise, orange, pink.

Sheath:
- LLDPE 1.0 mm
- Acc. to IEC 60811 and IEC 60708
- Black

Physical properties
Nominal outer diameter:
- 2-16 fibres: 6.0 mm
- 18-24 fibres: 6.5 mm

Nominal weight:
- 2-6 fibres: 40 kg/km
- 18-24 fibres: 45 kg/km

Tensile strength:
- Test E1 acc. to IEC 60794-1-2
- Max. installation: 1000 N
- Short term: 750 N

Compressive strength (crush):
- E3 test method: 1500 N

Impact:
- E4 test method: 15 Nm

Torsion (E7 test method):
- 5 cycles ± 1 turn

Kink (E10 test method):
- No kink for loop of diameter 100 mm

Bending radius (E11 test method):
- Unloaded: min. R = 60 mm
- Loaded: min. R= 100 mm

Temperature range (F1 test method):
- Storage: -40°C to +60°C
- Installation: -20°C to +40°C
- Operations: -20°C to +60°C

Water penetration (F5B test method):
- No water on free end

All information is presumed accurate upon issuing. Prysmian Group reserves the right to change in specifications without prior warning. Product specifications are not contractually binding without prior permission from Prysmian Group.

Fibre cable

FIXED INSTALLATION

UC FIBRE - OUTDOOR CENTRAL TUBE CABLE
1500N 2-24 FIBERS LLDPE A-DQ(ZN)B2Y

Application
Central tube cable with up to 24 fibers and a diameter of 2.8 or 3.5 mm. Coated glass rovings gives the cable a high tensile strength and a certain rodent protection. With its LLDPE sheathing this cable is ideal for outdoor installation. Applicable for primary area (campus backbone) for medium and long distances, with installation in ducts or trays as well as for direct burial with proper sand back filling.

The cable is UV-resistant, metal-free and longitudinally watertight.

Standard
> IEC 60794-1
> ISO 11801 2nd edition
> EN 50173-1

Construction
Loose tube:
> Ø2.8 mm jelly filled with 2–16 fibres
> Ø3.5 mm loose tube with 24 fibres
Strength member:
> Waterblocker E-Glass fiber element
Fiber colour code Ø2.8 mm:
> Red, green, blue, yellow, white, grey, brown, violet, turquoise, black, orange, pink
Fiber colour code Ø3.5 mm:
> Yellow, white, grey, turquoise, orange, pink, yellow, white, grey, turquoise, orange, pink.
Sheath:
> LLDPE 1.2 mm
> Acc. to IEC 60811 and IEC 60708
> Black

Physical properties
Nominal outer diameter:
> 2-6 fibres: 6.5 mm

Long-Term Immersion in Water

TECSUN (PV) cables are tested for minimum 10 days completely immersion in water at 85°C, with 1,8kV DC voltage applied.

De-rating Factors

De-rating factors are used to properly calculate the current carrying capacity, taking into account the installation and operating conditions. In case of use at an ambient temperature greater than 60°C, please consider the de-rating factors indicated in EN50618, Table A4. For installation in groups, the de-rating factors from HD60364-5-52 apply.

Properties of TECSUN (PV) H1Z2Z2-K acc. to DIN EN 50618

**Mechanical Parameters**

**Tensile Load**
The maximum tensile load on the TECSUN (PV) cables is equal to 15 N/mm² in operation and 50 N/mm² only during installation, according to HD 516, DIN VDE 0298-3 and DIN VDE 0298-300.

**Bending Radius**
The minimum bending radius is indicated as the product of the overall diameter of the finished cable (D) and a factor (i.e. 3xD). For TECSUN (PV) the minimum bending radius according to EN 50565-1, is 3xD (for D≤12mm) or 4xD (for D>12mm). Smaller bending radii than permitted can cause a reduced service lifetime.

**Mechanical Characteristics of Insulation and Sheathing Materials**
The properties of the materials (tensile strength and elongation at break) are tested before and after ageing. Hot-Set test and thermal endurance test are performed in addition.

**Abrasion Resistance**
TECSUN (PV) cables are tested against several abrasive materials:
- sheath against abrasive paper
- sheath against sheath
- sheath against metal
- sheath against plastics

**Additional Tests**
- Shrinkage Test
- Pressure Test at High Temperature
- Dynamic Penetration Test
- Durability of Print
- Sheath-Hardness
Properties of TECSUN (PV) H1Z2Z2-K acc. to DIN EN 50618

Thermal Parameters

Maximum Temperature of the Conductor during Operation
TECSUN (PV) cables are designed to operate at 90°C for a total lifetime equal to 30 years, according to Arrhenius-Diagram (EN 50618 requires a minimum of 25 years). For a maximum of 20,000 hours (= 2.3 years) the cables can operate at a maximum conductor temperature of 120 °C.

Maximum Temperature of the Conductor during Short Circuit
The maximum permitted short-circuit temperature is 250°C, for a duration of 5 seconds.

Ambient Temperature
The temperature range on the surface of the cable during operation is from -40°C to +90°C. During installation and handling, the range is from -25°C to +60°C.

Resistance to Cold
The following tests are performed on TECSUN (PV) cables:
- Cold impact at -40°C
- Cold bending at -40°C
- Cold elongation at -40°C

Damp Heat Test
Mechanical properties of the materials are tested after a 1,000 hours conditioning at +90°C and 85% relative humidity.
Properties of TECSUN (PV) H1Z2Z2-K acc. to DIN EN 50618

Chemical Parameters

Behaviour against Fire

TECSUN (PV) cables are tested for flame propagation on single cable according to EN 60332-1-2 and on multiple cable according to EN 50305-9. The smoke density is tested according to EN 61034-2, with light transmittance > 70%. The cables are halogen-free according to EN 50525-1 - Annex B, and with a toxicity index < 3 (per EN 50305).

Oil Resistance

In addition to the normative requirements, sheathing material is tested for 24 hours immersion in oil at 100°C.

Weather Resistance

External agents related to weather conditions (such as UV radiations, ozone and water) can degrade the rubber materials, causing a reduction of the performances of the cables. Therefore TECSUN (PV) cables are tested in order to ensure:

- Ozone resistance: complete cable has no cracks after 72 hours at 40°C, with 55% relative humidity and 2ppm of ozone concentration
- UV resistance: tensile strength and elongation at break are measured after a conditioning of 720 hours (360 cycles) exposed to UV light

Acid and Alkaline Resistance

Resistance of the sheathing material against a 23°C acid (N-Oxalic Acid) and alkaline solution (N-Sodium Hydroxide) is tested for 7 days.

Ammonia Resistance

In addition to the normative requirements, TECSUN (PV) is tested for 30 days in saturated ammonia atmosphere.
Appendix

Ageing and Misuse Effects

Cable overheating effect

Ozone damage effect

Cable overheating effect

Ozone damage effect

Cable handling misuse - bending radius too small

Installation misuse - violent pressure
